

April 28th, International Workers' Memorial Day.

STRESS

the killer in our schools

For those teachers it doesn't kill— it can turn them into
exhausted and dispirited
ROBOTS

Pupils are getting less teacher time because of larger classes
Schools are becoming exam factories which stress pupils
More subjects are cut from the curriculum

Teachers are working 60-70 hour weeks
Teachers feel isolated and that no-one cares about pupils' needs
More and more teachers are leaving teaching

Join the fight for fair funding!
Save our schools!
